ABOUT US

Leema Creations Pvt Ltd is a multi-award-winning company with a team of professionals and expert craftsmen specialized in interior design and furniture manufacturing. Founded by the current Chairman Mr. Channa Wijesekara who is the leading timber technologist and an Engineer by profession, the organization has catered to the most elite customers throughout the country and overseas. The international recognition with projects in Bangladesh and India proves that Leema Creations transcends the ordinary in the interior industry.

Leema is ISO certified and an acclaimed and renowned “Interior Solutions” turnkey contractor.

Leema Creations creates spaces that embody pure luxury through the skill base and expertise that covers the spectrum of design, development, and delivery. The company offers services such as space planning, interior design consultation, interior fitting-out including furniture and corporate concepts for both commercial and residential customers.

Leema’s superior capability of designing and executing commercial interior solutions is one of the most acknowledged features in the interior industry in Sri Lanka. The company's workplace strategy is empowered by its industry knowledge, expertise, experience, and awareness of the general trends.

Their passionate design team enjoys the challenge of creating innovative and fresh ideas and designs for interior fit-out works and the many years of experience and collective knowledge is the foundation of their achievement. The phenomenal success of Leema Creations is due to the complete trust placed by the existing customers for providing them innovative, quality, reliable, and value for money solutions for their needs. The signature design characteristics of ‘Leema’ with faultless and quality material with state-of-the-art technology gives them the competitive edge in the Sri Lankan market.

LEEMA STATE OF THE ART MANUFACTURING COMPLEX

Leema has a state-of-the-art factory with a production floor area of 100,000 square feet and all of the necessary modern plant and machinery such as CNC Routing Machines, Automatic Edge Banding Machines, Post Forming Machines, Double-Head Multiple Boring Machines, surface Planers, Thickness Planers, Multi-Borer, Sliding Table Panel Saws. Further we have in-house conventional kilns with a capacity to kiln dry 50,000 square feet of 01 inch timber planks per month in a single cycle of 8-12 days duration for the extraction of moisture content from raw timber. The kiln uses electric powered boilers to provide steam to heat the kiln chamber and gradually remove the water from the timber. The removed water turns in to water vapor by this evaporation process.

The factory also has in-house vacuum pressure chemical impregnation plant for the introduction of chemical substances into wood to improve its characteristics and impart new properties. This process stabilizes dimensions, protection from termite infestations and treatment against fungi and increases strength and resistance to water, moisture and reduces cracking. The common chemical used for treatment is Boron-Borax chemical compounds.

Timber Log conversion is also performed in-house. We have our own saw milling division with the necessary gantries, circular saw benches and latest Thin Kerf Narrow Band Saw Milling Machine (Wood Mizer) of USA origin. The Thin Kerf Narrow Band Saw Milling Machine is the most suitable for log conversion as the wastage of timber is drastically reduced due to the very thin saw kerf of 2.5 – 3.0mm that is used.

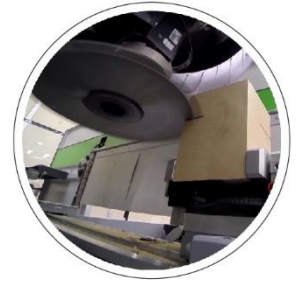

Our passionate design team enjoys the challenge of creating innovative and fresh ideas and designs for interior fit-out works and the many years of experience and collective knowledge is the foundation of our team. Our in-house Creative Design Department with several long serving talented and skilled members is an important aspect of the services that we offer our valued customers.

DURLAX

LUXOR[®]

100% ACRYLIC UV SOLID SURFACE

Luxor is the only 100% acrylic UV solid surface brand in Sri Lanka

Superior aesthetics and unique

Luxor 12mm thickness is tested & approved

Excellent resistance to tensile & shear static loads

Fire resistance class A

US FDA approved manufacturing units

Excellent resistant for pull out with Luxor also on frame work faster

aspiron[®]

SOLID SURFACES

Aspiron is a solid surface offering superior design possibilities and excellent long term performance

It can be used both in home and many different commercial environments from hotels to healthcare, retail to marine

With its balance of beauty and performance, aspiron leads itself to imaginative uses, innovative designs and enduring applications

aspiron can be carved, routed and worked like wood, moulded, thermoformed or inlaid. Seamlessness increases the design option to almost limitless

OUR CREATIVE TEAM

We have the largest and most experienced team of professional designers in the interior industry Sri Lanka

CHAIRMAN

Mr. Channa Wijesekara is an incorporated civil engineer passed out from University of Moratuwa and an award winning, accomplished entrepreneur. He currently is serving as a member of the prestigious Engineering Council of Sri Lanka (ECSL). He also is the incumbent President of the Wood Based Industrialists Association of Sri Lanka. Mr. Wijesekara is a scholar who has written several valuable books on 'Wood Technology' during his illustrative career. His experience in the industry is for over 40 years and can be categorically named as one of the best Wood Technologists in Sri Lanka currently. He has obtained most of his technical knowledge initially through an educational stint in Germany and later in other countries as well. Channa Wijesekara's experience and acquaintance to the wood sector as a student, trainee, trainer, educator, curriculum writer and administrator finally made him successful and an acclaimed entrepreneur.

TESTIMONIALS

Toyota has to maintain world class showrooms & maintenance facilities in Sri Lanka. Leema creations has immensely the helped us to create this facility. Their professional service and flexibility has immensely the help us.

Mr. Manohara De Silva - Director / Chief Operating Officer, Toyota Lanka

Sri Lanka Anti-Doping Agency was established in 2013 and we were short of a building to operate. We had to call for design and built of the interior of the store building which was constructed and Leema Interior was awarded to do the needful for us. They come out with different ideas to cater to our requirement. Especially the boardroom, the auditorium and the library. If we take one by one, the auditorium is done with tasteful colors for the seating and the carpeting. The main head table was done using teak material and the board room, it really looks exquisite with the special design that matched what we wanted to get done. Overall I have to say, that the staff was very courteous and always attended to our requirment. We are very happy that we awarded to Leema Interior in this regard and I wish Leema Interior the very vest for their future engagements.

Dr. Seevali Jayawickreme - Director General, Sri Lanka Anti-Doping Agency

We have worked with Leema for few years and have known team to be very dependable and the work they have performed has been quite excellent and all goals have been reached. We will continue to work for specialized retail interior projects.

Mr. Kapil Sharma - Senior General Manager, Dialog Axiata PLC
